RE: FIRE ALARM SYSTEM NEW INSTALLATION -
AUTOMATIC FIRE ALARM & EVACUATION SYSTEM

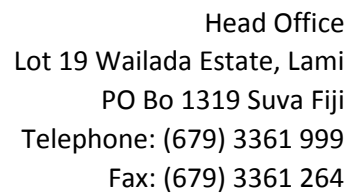

Thank you for the opportunity to submit our proposal for the design, supply, installation, commissioning and final certification of Fire Alarm Detection System and Fire Equipment's as required by the standard NZS4512:2010 and National Building Code Section NE for the abovementioned premises.

Should you choose Evergreen Fire & Security for your project you will have chosen a company with a proud associated history in delivering fire protection system solutions in Fiji since 1970.

With this history and experience you can be confident you will benefit by dealing with a subcontractor who uses:

- Comprehensive Environmental Health & Safety program
- World class products from the Tyco range
- Dedicated and experienced project team
- Superior after sales service operating 24 hours a day 7 day's week
- Occupational Health & Safety Compliance in accordance with Fiji MOL legislation at ALL TIMES

To provide the works as described herein, attached is the quotation options:
